Professional Profile

I am currently a software development student, aspiring to commit to a career in tech. After first learning programming at university, and completing numerous coding challenges with Python while overseas, I have realised that my aptitude for problem-solving and creativity could be best utilised in a software development position. Thus, I hope to make this a life-long pursuit.

Education

Web Development - Accelerated

Mar 2023 - Sep 2023
Coder Academy - Australian Institute of Technology

- Current grade: High Distinction
- Areas studied: Front-End, Back-End, Databases, Computer Science
